

BlockID Startup Passport

Know what your startup is worth, and who owns it.

Agents propose. Humans approve. Chains prove.

AI valuation you can audit + tokenised shares you can prove — for every startup.

BLOCKID STARTUP PASSPORT • TESTNET DEMO

Give your startup a passport: **valued by AI, approved by people, proven on-chain.**

Paste your website and get an investor-ready valuation in minutes, with a source behind every number. Then turn your shareholder list into digital shares you can issue, track and pay dividends on. AI does the homework, but nothing happens until a real person signs off.

Testnet demo. Not an offer of securities.

✓ Valuation in minutes, every number sourced

✓ Digital shares for verified shareholders only

✓ Dividends paid automatically, no gas for holders

✓ Every AI decision human-approved and provable on-chain

Website in. Cited valuation and verified cap table out.

TODAY

- Cap tables in Excel — nobody can prove ownership
- Valuations slow, costly and unsourced
- Shareholders can't verify anything

WITH BLOCKID

- Minutes: AI valuation with every figure cited
- One approval: KYC-gated shares on-chain
- Anyone can verify, on three chains

NEW VALUATION

Eight steps from website to wallet

Gold steps need an admin approval before anything is written on-chain.

Paste your website

We read public pages only: product, team, pricing, press. No login or documents needed to start.

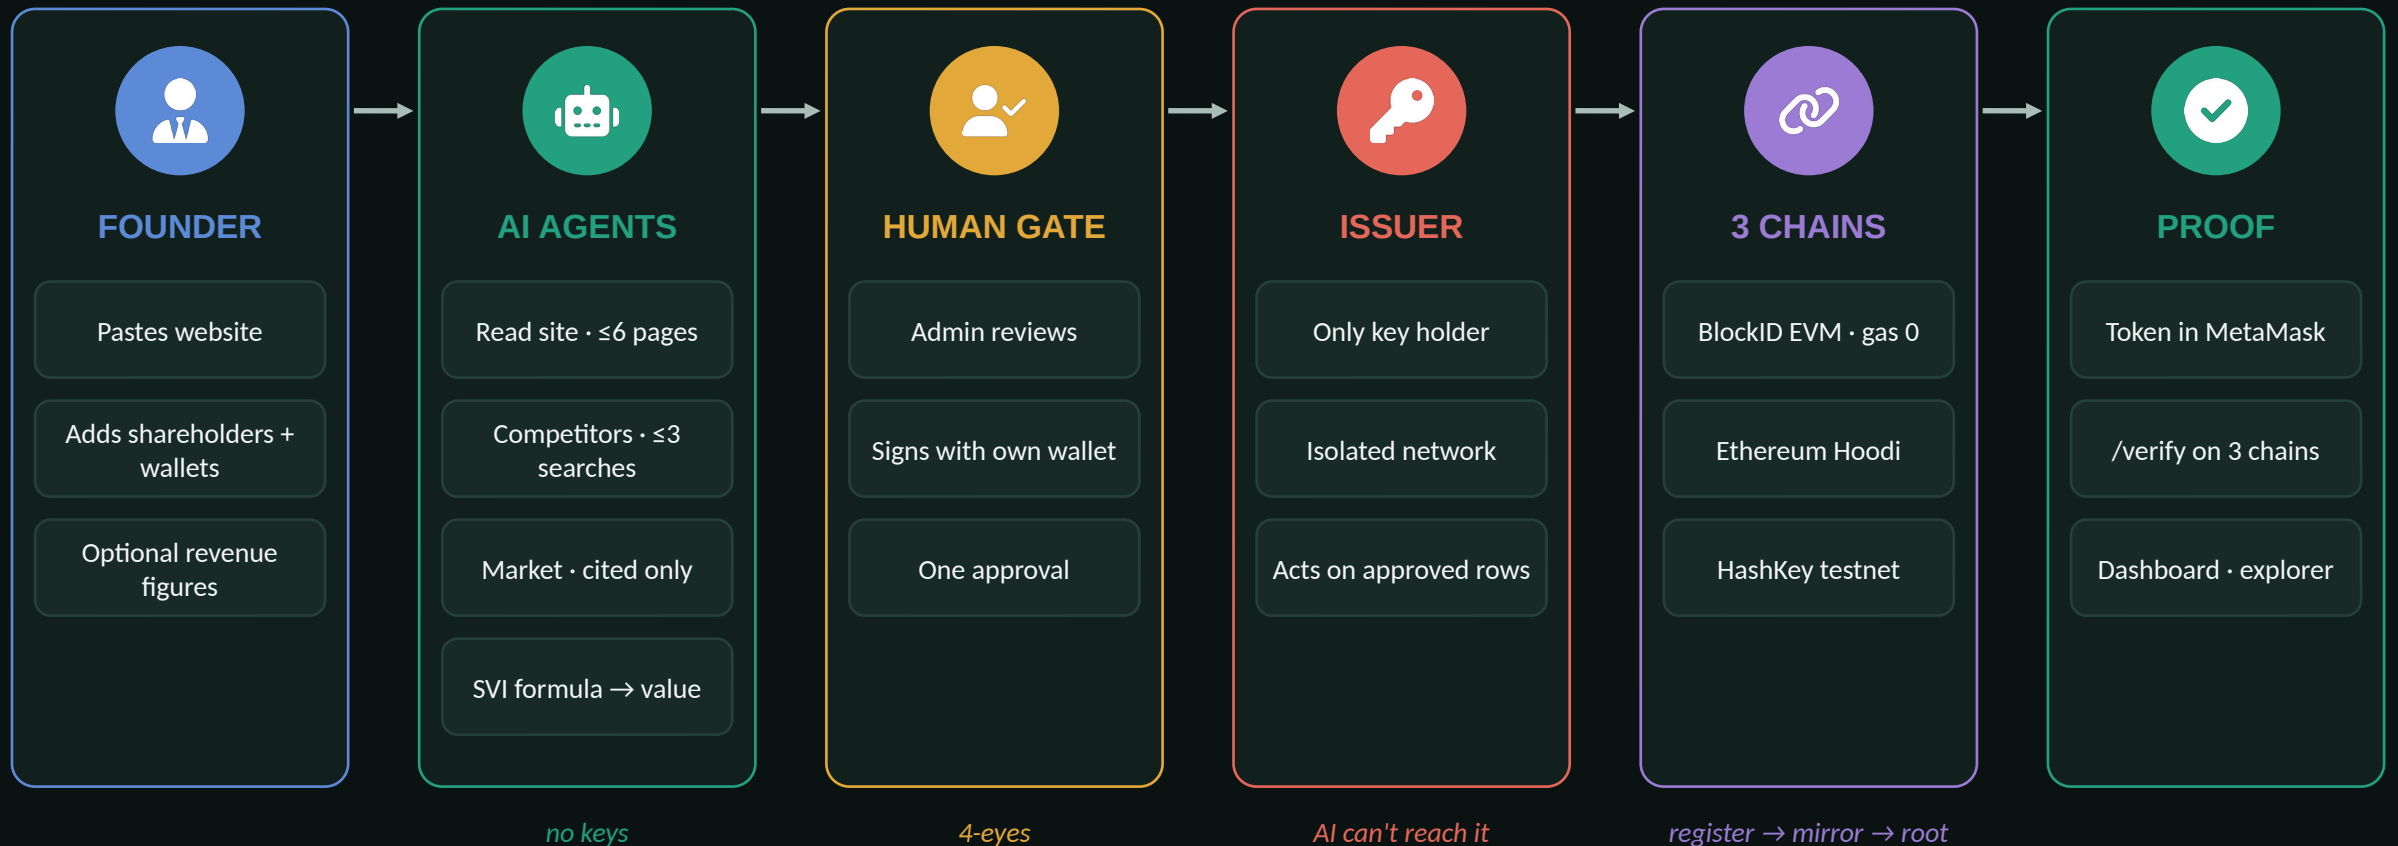

Connect wallet · Start valuation

▼ Add your numbers (optional, improves accuracy)

Self-reported. Shown as such in the report. A website rarely states revenue, so without these figures the revenue and growth scores stay near zero.

Revenue, last 12 months (A\$)	Revenue growth, year on year (%)	Gross margin (%)	Paying customers
A\$ -	-	-	-
Raised to date (A\$)	Runway (months)	Employees	
A\$ -	-	-	

Agents propose. Humans approve. Chains prove.

Under the hood LLM: SambaNova → Claude → DeepInfra · Search: Brave → Claude web search · Postgres job queue · Merkle cap-table roots in CapTableAnchor · nginx + Cloudflare, CSP, SSRF-safe crawler

AI scores. A fixed formula decides. Every figure is cited.

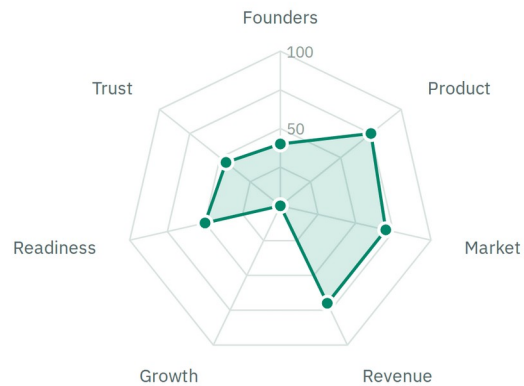

Valuation report

Scores come from the model and from your numbers. The admin can adjust any AI score before approving.

✓ Approved

C **A\$5.08B** $SVI\ 54.5 \cdot A\$5.08B = A\$5.08B$

SVI profile

How the index is built

Score × weight = contribution. The sum is the SVI index.

Founders · 40		×0.20	8.0
Product · 75		×0.15	11.3
Market · 70		×0.20	14.0
Revenue · 70		×0.20	14.0
Growth · 0		×0.10	0.0
Readiness · 50		×0.10	5.0
Trust · 45		×0.05	2.3
SVI Index · grade C			54.5

- 7 SVI dimensions, fixed public weights
- Grade A-E → A\$ low · mid · high
- Uncited claims are dropped
- Admin can override any AI score

Airwallex → 8 competitors found (Wise, Revolut, OFX...) → SVI 54.5 · grade C

One approval creates the register on three chains.
