

BlockID Business Passport

Know the business you invest in.

BlockID Business Passport gives every shareholder, large or small, a live view of the business they own: updates and valuations checked and approved by people, a share register on blockchain as proof of ownership, and dividends paid straight to their wallet.

Understand it • Follow it • Own it • Get paid • Check it

3

chains, every record checkable

Investing in a business is hard to follow.

You don't really understand the business

Reports are long, late or missing. The numbers are hard to compare.

You lose sight of it after you invest

Sales, profit and new share sales happen without you seeing them.

You're not sure what you own

Ownership sits in a spreadsheet. Your stake can shrink and no one tells you.

Dividends are slow, or never arrive

Paperwork and bank transfers, if they happen at all.

Big or small, most investors in a business face the same four gaps.

Trillions in private businesses. Investors still can't see inside.

How big is it? (US\$ trillion)

Alternative assets under management,

11%

of value paid back to private-equity investors in 2024, the lowest in a decade (2014–17 average: 29%). Bain, Mar 2025

2.81M + 1M+

businesses in Australia (ABS, Jun 2026) and Vietnam (NSO, 2025). SMEs are ~90% of all firms (World Bank).

16%

of alternative assets are held by individuals, who own ~50% of global wealth: retail access is the growth path. Bain, 2023

One passport per business. Five things every investor gets.

Understand it

A plain report. Every number linked to where it came from.

Follow it

Regular updates and a fair value, approved by a person.

Own it

Your shares on a public share register — your proof.

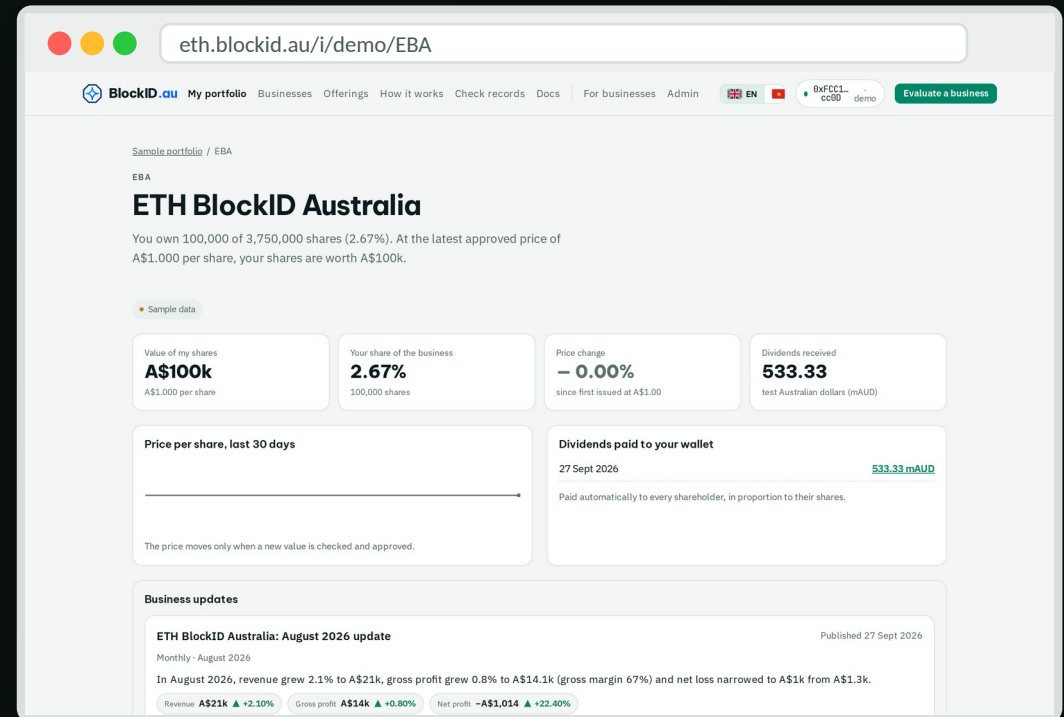

Get paid

Dividends go straight into your wallet, automatically.

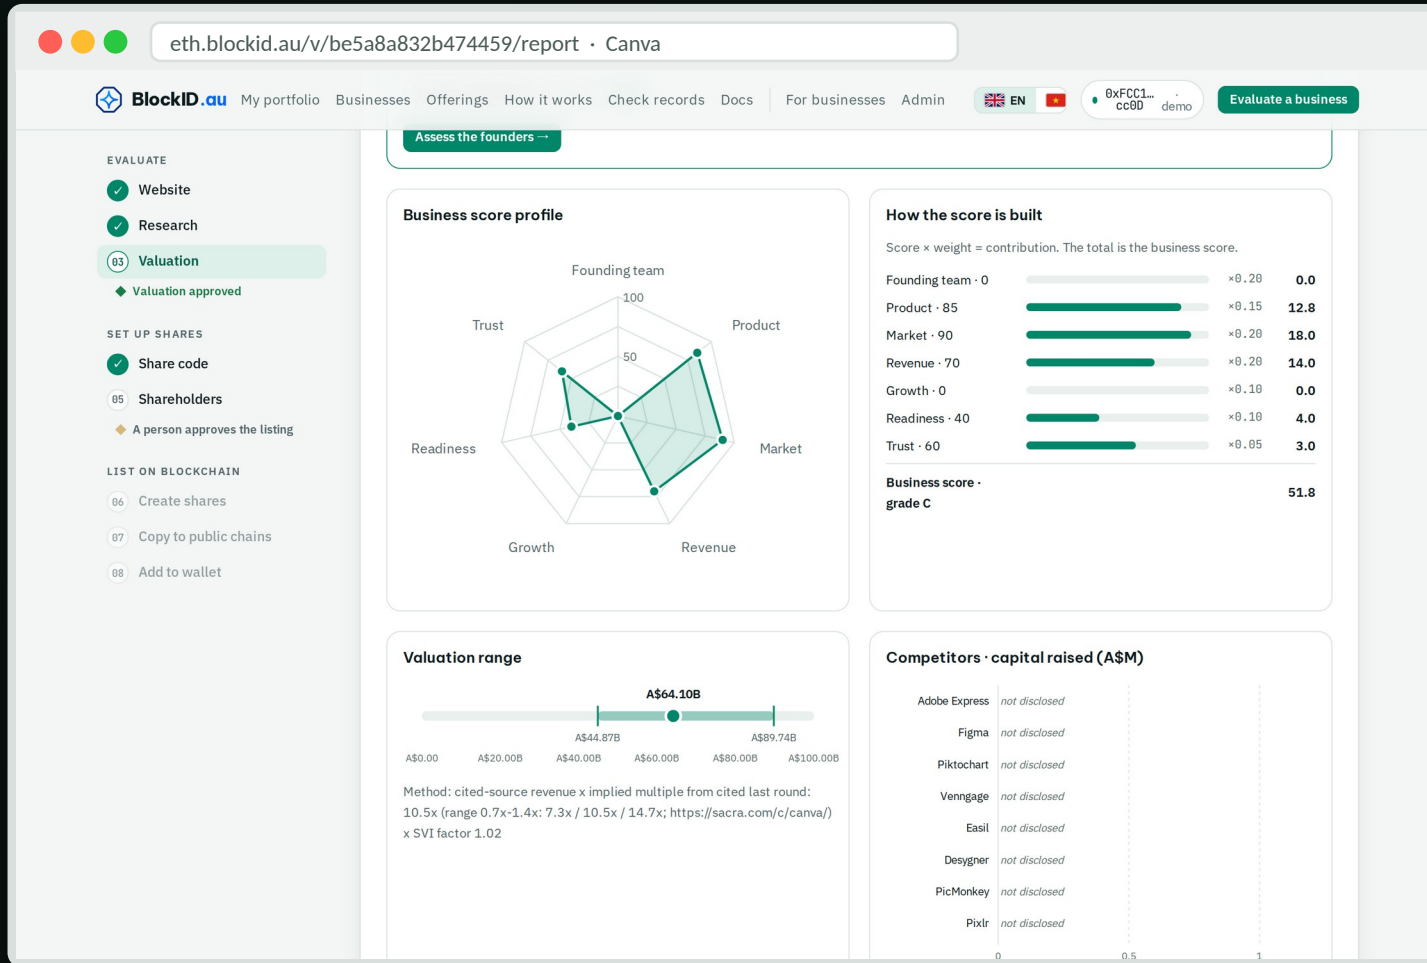

Check it

Anyone can check the numbers and the register.

What a shareholder sees: the live demo account

A fair value you can trace, approved by a person.

- Paste a website. Get a plain report in minutes.
- Clear business score A-E and a low · mid · high value.
- Every figure links to its source. No source, no number.
- A person checks and approves before anyone sees it.

Canva: A\$64B mid value, every source listed, approved by a person.

Your shares are on the record. The record is your proof.

- Every holder, wallet and share count in one share register.
- Recorded on blockchain and copied to two public blockchains.
- New shares need a person's approval — you see the dilution first.
- Hold your shares in your own wallet, or sign in with Google.

14 sample listings • 42 share records on blockchain

Same update for everyone. Dividends to your wallet.

1

Business shares its numbers

weekly, monthly, quarterly or yearly

2

Plain-language update + fair value

a person approves it before it goes out

3

Every investor gets it at once

record stored on blockchain, anyone can check

4

Dividend rule approved once

24 hours to cancel, then paid to every wallet — no fees for holders

Don't trust us. Check it yourself, in your browser.

eth.blockid.au/verify/EBA

The AI only scores the 7 SVI dimensions. A fixed public formula turns those scores into the index and the valuation, and the hash of the full report is written on-chain. Recompute it here, in your own browser.

- 1 AI suggests 7 dimension scores; an admin confirms them
- 2 A fixed public formula computes the SVI index and the value
- 3 keccak256 of the canonical report JSON is anchored on-chain
- 4 Anyone recomputes the hash and compares: same input, same output

Company: EBA · ETH BlockID Australia [Open company →](#)

Verified: the on-chain hash matches this report
Browser, server and 3 on-chain record(s) agree byte for byte. Nobody changed this report after it was approved.

Three independent hashes

Browser hash	Server hash	On-chain hash
keccak256 computed right here in your browser (viem). 0xa1466362b035ecc804caf101986edc4de73697cacf5 /E/7702V/5A74/5127-77-77	The same text re-hashed by the BlockID API (Python). 0xa1466362b035ecc804caf101986edc4de73697cacf5 /E/7702V/5A74/5127-77-77	valuationReportHash() read from each share token. BlockID Chain 0xa1466362b035ecc804caf101986edc4de73697cacf5

eth.blockid.au/verify/EBA · tamper test

The AI only scores the 7 SVI dimensions. A fixed public formula turns those scores into the index and the valuation, and the hash of the full report is written on-chain. Recompute it here, in your own browser.

- 1 AI suggests 7 dimension scores; an admin confirms them
- 2 A fixed public formula computes the SVI index and the value
- 3 keccak256 of the canonical report JSON is anchored on-chain

Company: EBA · ETH BlockID Australia [Open company →](#)

Mismatch: this report is not what was anchored on-chain
You edited the report, so its hash no longer matches the on-chain record. Press Reset to restore it.

Three independent hashes

Browser hash	Server hash	On-chain hash
keccak256 computed right here in your browser (viem). 0xef691a047dc18a71c3a5e97f0de6635e181fc64ee6 /E/7702V/5A74/5127-77-77	The same text re-hashed by the BlockID API (Python). 0xef691a047dc18a71c3a5e97f0de6635e181fc64ee6 /E/7702V/5A74/5127-77-77	valuationReportHash() read from each share token. BlockID Chain 0xa1466362b035ecc804caf101986edc4de73697cacf5

✓ The report matches the record on 3 blockchains

✗ Change one number and it turns red

1. Your browser hashes the report

2. Reads the hash from BlockID, HashKey, Ethereum

3. Same = ✓ · changed = ✗

Real benefits for investors. Clear duties for the business.

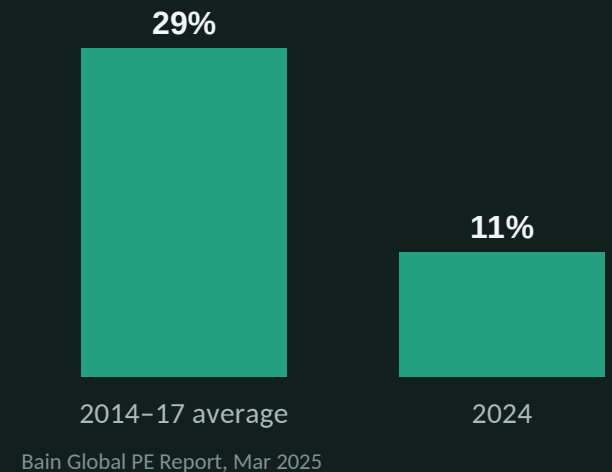

INVESTORS GET

- A checked value: every figure sourced, approved by a person
- The same update as everyone, at the same time
- Proof of ownership: a live share register on blockchain
- Dividends on schedule, straight to the wallet, no fees
- Dilution shown before any new shares are issued

THE BUSINESS MUST

- Keep a share register: already the law (AU Corporations Act s169 · VN Law on Enterprises 2020 Art. 122)
- Report on schedule; CSF companies report yearly, audit above A\$3M raised (ASIC RG 261)
- Get a person to approve every new share, dividend and transfer
- Answer the risks the numbers flag, on the record

Cash back to PE investors (% of NAV)

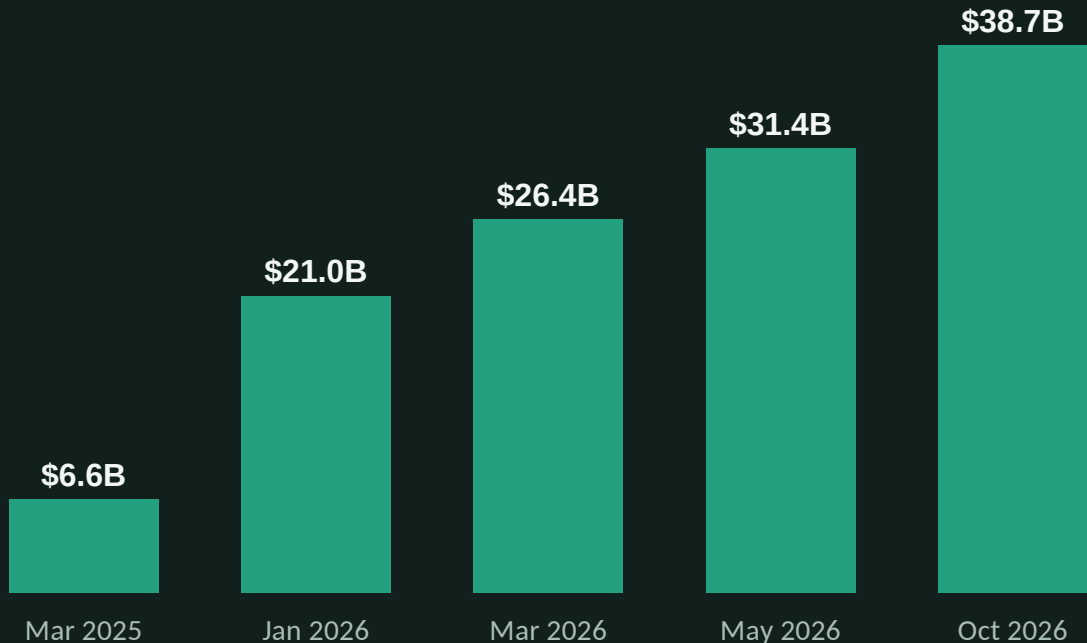

A\$837.7M

lost to investment scams in Australia in 2025.
NASC, Targeting Scams 2025

Built for the tokenised future: clear custody from day one.

Tokenised real-world assets on-chain (US\$ billion)

rwa.xyz "distributed" assets, excl. stablecoins (1 Oct 2026: \$38.66B, 5.02M holders). Earlier points: PYMNTS, ByteTree, Yellow citing rwa.xyz.

\$5.5T by 2030

tokenised assets, Citi GPS base case (Jun 2026; bear \$2.7T, bull \$8.2T)

THE RULES ARE ARRIVING
