

BlockID Business Passport

Know the business you invest in.

BlockID Business Passport gives every shareholder, large or small, a live view of the business they own: AI-analysed, human-approved updates and valuations, an on-chain share register as proof of ownership, and dividends paid straight to their wallet.

Understand it • Follow it • Own it • Get paid • Check it

Working end to end on testnet at eth.blockid.au

Investing in a business is hard to follow.

You don't really understand the business

Reports are long, late or missing. The numbers are hard to compare.

You lose sight of it after you invest

Sales, profit and new share sales happen without you seeing them.

You're not sure what you own

Ownership sits in a spreadsheet. Your stake can shrink and no one tells you.

Dividends are slow, or never arrive

Paperwork and bank transfers, if they happen at all.

Big or small, most investors in a business face the same four gaps.

One passport per business. Five things every investor gets.

Understand it

A plain report. Every number linked to where it came from.

Follow it

Regular updates and a fair value, approved by a person.

Own it

Your shares on a public share register — your proof.

Get paid

Dividends go straight into your wallet, automatically.

Check it

Anyone can check the numbers and the register.

What a shareholder sees

A fair value you can trace, approved by a person.

- Paste a website. Get a plain report in minutes.
- Clear business score A–E and a low · mid · high value.
- Every figure links to its source. No source, no number.
- A person checks and approves before anyone sees it.

Canva: A\$64B mid value, every source listed, approved by a person.

Your shares are on the record. The record is your proof.

Cap table

Ownership preview

- Every holder, wallet and share count in one share register.
- Recorded on blockchain and copied to two public blockchains.
- New shares need a person's approval — you see the dilution first.
- Hold your shares in your own wallet, or sign in with Google.
